### Description

The GenGrindBelt BT series is a dual stage, wet or dry table top belt grinder offering the most economical solution for manual grinding applications. The GenGrind BT - Dual Stage Belt Grinder for Metallographic Sample Preparation is designed for high material removal of various sample shapes and configurations. The BT - Belt Grinder system is a table top belt grinder suitable for laboratories designed for high material removal.

The Belt protective coverings are easily removed to remove and replace the grinding belts. A faucet is built in to the front of the unit for washing your specimens of any dust and debris. Water flow can be controlled for each individual belt. A vacuum connection is also recommended for the cleanest grinding operations. With a wide variety of consumables available, the GenGrind Belt BT Belt Grinder for metallographic sample preparation is your ideal choice for manual grinding operations.
